Pre-Safe Pulse

- Pulls back the front passengers into their seats against the direction of impact in a frontal collision
- Pulled in distance is released in a force-controlled way upon impact
- Pyrotechnical belt buckle and anchor fitting tensioner supplements pyrotechnical reel tensioner
- Belt strap is pulled in/released individually at each belt anchor point depending on the severity of the impact
- Tensioning is adjusted to the severity of the collision
- Stress from the force and acceleration are reduced
